

THE INTERNATIONAL PORSCHE GARAGE

Range Rover L322 Buyer's Checklist — 12 things to check before you buy

- ☐ **1. Air suspension**
Struts last ~70k miles. Sagging overnight or a compressor that never rests = money. Check AMK vs Hitachi compressor.
- ☐ **2. Timing chain guides (BMW V8)**
2002–2005 4.4 M62 rattles on cold start when guides are gone. Start it stone cold and listen.
- ☐ **3. Rust**
Rear arches, sills, and subframe. Get underneath — bubbles under the rear doors mean welding bills.
- ☐ **4. Gearbox (ZF 6HP26)**
Oil changes due every 80k. Harsh 2-1 downshift or flaring when hot = walk away or budget a rebuild.
- ☐ **5. Coolant valley pipe (BMW V8)**
Coolant smell or mysterious loss on the M62 = valley pan pipe. Engine-out territory if ignored.
- ☐ **6. Electrics & water ingress**
Sunroof drains flood the footwell ECU. Water in the spare-wheel well kills rear electronics. Check both.
- ☐ **7. Turbo (TDV8)**
White smoke or whistling under load = turbo trouble on the 3.6. Oil feed pipes clog — check service intervals.
- ☐ **8. Service history**
Stamps every year regardless of miles. These punish neglect harder than almost anything on the road.
- ☐ **9. Tyres & brakes**
Heavy car, big bills. Check date codes, pad depth, and for warped-disc judder under braking.
- ☐ **10. Transfer box**
Clunk on takeoff or binding in tight turns = transfer box wear. Engage low range and listen.
- ☐ **11. Diagnostic scan**
A GAP IIDTool / specialist scan before you buy. Fault codes reveal the electrical story instantly.
- ☐ **12. Title & accident history**
HPI check for Cat N/S (UK) or Carfax (US). Plenty of these have had a hard life — verify it.

Buying the car is step one — keeping it alive is the rest. Our workshop manuals cover every job on this list, step by step.
