

THE INTERNATIONAL PORSCHE GARAGE

Range Rover L405 Buyer's Checklist — 12 things to check before you buy

- ☐ **1. Timing chain (petrol V8/V6)**
5.0 V8 and 3.0 SC V6 suffer tensioner/chain wear — rattle on cold start. Listen stone cold, budget thousands if noisy.
- ☐ **2. Coolant crossover pipes**
Plastic front/rear crossover pipes on the V8 go brittle and burst. Check for replacement with uprated parts.
- ☐ **3. Air suspension**
Sagging corner or a compressor running constantly. Struts and valve blocks wear — test every height setting.
- ☐ **4. Gearbox (ZF 8HP)**
Superb box, but needs oil changes ~every 80k. Jerky shifts or hesitation when hot = neglected fluid or worse.
- ☐ **5. Crankshaft (3.0 TDV6 diesel)**
The diesel V6 can snap cranks, often after oil starvation. Full oil-service history is everything on these.
- ☐ **6. DPF & EGR (diesels)**
Short-trip diesels clog DPFs and EGRs. Warning lights or limp mode on the test drive = expensive emissions work.
- ☐ **7. Electrics**
Test everything: tailgate, cameras, infotainment, heated screens. Battery drain gremlins are common — check battery age.
- ☐ **8. Rust (chassis)**
Aluminium body, but steel subframes, sills, and rear crossmember rust. Get it on a ramp before you commit.
- ☐ **9. Tyres & brakes**
22-inch rubber and huge brakes = four-figure bills. Check dates, depths, and for judder under braking.
- ☐ **10. Panoramic roof drains**
Blocked drains soak the headliner and boot electronics. Check for damp carpets and water stains.
- ☐ **11. Pre-purchase inspection**
Land Rover specialist PPI with a full diagnostic scan. The electronics alone justify it.
- ☐ **12. Title & accident history**
HPI check for Cat N/S (UK) or Carfax (US). High-value cars attract clocking and cut-shuts — verify mileage.

Buying the car is step one — keeping it alive is the rest. Our workshop manuals cover every job on this list, step by step.
