

THE INTERNATIONAL PORSCHE GARAGE

Porsche Macan Buyer's Checklist — 12 things to check before you buy

- ☐ **1. Transfer case**
2015–2018 cars wear the transfer case — shudder or clunk on slow turns. Check for replacement under warranty.
- ☐ **2. Timing cover oil leak (V6)**
The 3.0/3.6 V6 weeps oil from the timing cover. Look underneath for fresh oil around the front of the engine.
- ☐ **3. PDK service history**
Fluid and filter changes due roughly every 40k miles. Skipped PDK services are a red flag on any Macan.
- ☐ **4. Air suspension (if fitted)**
One corner sitting low overnight or a noisy compressor = strut or compressor on the way out.
- ☐ **5. Service history**
Annual or 10k-mile services, Porsche or specialist. Gaps mean deferred maintenance on a performance SUV.
- ☐ **6. Brakes**
Big, heavy car = big brake bills. Check pads, disc condition, and listen for grinding on the test drive.
- ☐ **7. Tyres**
Wide staggered rears wear fast and cost plenty. Date codes and even wear across the axle matter.
- ☐ **8. Coolant leaks (2.0T)**
Thermostat housing and water pump weep on the four-cylinder. Check coolant level and for pink crust.
- ☐ **9. Electrics & PCM**
Test every screen, camera, and sensor. Infotainment glitches often trace to a weak battery — check its age.
- ☐ **10. Sunroof drains**
Blocked drains soak the headliner and footwells. Check for damp carpets and musty smell.
- ☐ **11. Pre-purchase inspection**
Porsche specialist PPI with a full fault-code scan. Cheap insurance on a tech-heavy car.
- ☐ **12. Title & accident history**
HPI check (UK) or Carfax (US). Panel gaps and paint mismatch reveal the ones that have been hit.

Buying the car is step one — keeping it alive is the rest. Our workshop manuals cover every job on this list, step by step.
